

Mica Insulated Nozzle & Band Heaters

APPLICATION

Low cost electric heating of plastic processing, rubber vulcanizing, Drums, Barrels & cylinders etc.

CONSTRUCTION

Mica insulated Heaters consist of electric resistant ribbon / round wire element covered with zinc plated MS, Brass or SS sheet with clamps. Size & terminal connections as per requirement.

CONNECTION

For contact accessories, cable fittings, clamping devices, fixed & braided connection, heat resistant, flexible insulation with metal braided cable housing of any convenient length, connection boxes & types according to the band heaters dimensions, power & type of power supply.

STANDARD SIZES & CAPACITIES

Max. Watt density: Any convenient Wattages up to 25 W/Sq. inch.

Max. Surface Temp. 300 Deg. C.

Supply (Volt) – Any convenient Voltage under the pre condition that it should be technically feasible.
